- Completed Keying Request Information Form

The KSS/Distributor works directly with the end user to acquire keying instructions for the permanent masterkeyed cores and keys, including both new system design and existing system expansion, according to the project requirements. The KSS/Distributor also manages the process from keying instructions to delivery and can serve as a point of contact for information on the progress of permanent core/key delivery completion.

SERVICE DELIVERY:

Permanent Core delivery is contingent upon several factors such as:

- The negotiated delivery dates as determined between the end user, Distributor and Stanley during the keying review and design processes;
- End user's written approval of the keying instructions;
- Size and complexity of the keying system being produced; and
- Stanley's receipt of payment from the Distributor.

GENERAL:

- Remember to furnish door and location information for all "tag-in" orders (add-ons to initial project orders)
- If you have advance knowledge that your project will be phased and require multiple orders from Stanley, please include these details in your order.
- A master hardware schedule for phased projects is always preferred.

CONSTRUCTION CORES

CONSTRUCTION CORE ORDERS: All keyed locks shipped from Stanley for new construction projects in which cores have been ordered will receive disposable black plastic (non-keyed) construction cores at no additional charge.

Disposable black plastic cores for less-core orders may be purchased separately for $1.50 net.

Standard brass (keyed-alike) construction cores may be purchased for a net price of $8.00 each.

No further discount will be applied.

Construction cores are used for controlling access to premises during construction and ARE NOT INTENDED FOR USE WHEN PREMISES ARE OCCUPIED OR FURNISHED IN ANY MANNER. When increased security is needed please contact your local Stanley Sales Representative.
