## ARCHITECTURAL HINGES

HAGER

### HAGER BB1279

#### Ball Bearing - Standard Weight

Two ball bearings

Steel with steel pin (ANSI A8112) For use on medium weight doors requiring medium frequency service.

**BB1279 4-1/2" x 4-1/2" US26D**

**\$12.00**

**BB1279 4-1/2" x 4-1/2" US10A**

**\$15.00**

### HAGER BB1168

#### Ball Bearing - Heavy Weight

Four ball bearings

Steel with steel pin (ANSI A8111) For use on heavy weight doors requiring high frequency service.

**BB1168 4-1/2" x 4-1/2" US26D**

**\$20.00**

**BB1168 4-1/2" x 4-1/2" US10A**

**\$25.00**

PBB

### PBB

#### Full Mortise Template Ball Bearing Hinges

PBB, Inc. template hinges are manufactured to close tolerances and meet all specifications and requirements set by all American National Standards Institute (ANSI). 4-1/2" x 4-1/2"

**BB81 US26D**

**\$10.00**

**BB81 US26D**

**\$12.00 (NRP)**

**SP81 US26D**

**\$15.00 (SPRING HINGE)**

MARKAR

### MARKAR REINFORCING PIVOT HINGE

Markar's reinforcing pivot hinge is a surface

mounted reinforcing hinge available for on site installation. Here's the answer to that ever-present problem of hinges with excessive wear and tear. The Markar reinforcing pivot hinge can be installed without special preparation by normal maintenance personnel and is a simple solution to the problem of loose screws, distorted hinges leaves, pulled open knuckles and splits or wood doors.

**B1923 Full Surface for 4-1/2"**

wide hinges

**\$41.00**

HINGE DOCTOR

### HINGE DOCTOR

A great way to repair those sagging metal

doors. All you do to fix it is to slip the tool over the door hinge and open the door. This action causes the door hinge to bind. While the tool is in place, open the door only an inch or two past the point of where it binds against the tool. Then remove the tool from the hinge and check the door.

**HA1 For 4-1/2" x 4-1/2" Hinges**

**\$45.15**

**HA3 For Ball Bearing Hinges**

**\$51.00**

## CONTINUOUS HINGES

### HAGER 780 SERIES CONCEALED LEAF 780-112 / 780-112HD STANDARD DUTY, HEAVY DUTY OR LEAD-LINED

HAGER

#### SPECIFICATIONS

Material:	Aluminum 6063-T6
Clearance:	5/16" (8 mm) hinge side plus standard lockside clearance
Fasteners:	Dril-Kwik® screws
LL Fasteners:	1/2 Dril-Kwik® screws, 1/2 wood screws
Length Options:	Standard and custom lengths available
Door/Frame Reinforcement:	None required to 200 lbs., heavier weight use 16-gauge channel
Optional Fire Rating:	Up to 3-hour metal and 90 minute wood composite (with studs)
Notes:	See additional fire rating details on page 3

#### FEATURES

- Standard duty for medium frequency doors. Heavy duty for high frequency doors or heavy, medium frequency doors.
- Lead lined model for hospital x-ray room doors with double row of screws to straddle lead (Specify "LL")
- Frame and door leaf alignment ribs for proper hinge and door location

### SCHLAGE ALX SERIES

#### DEPENDABLE PERFORMANCE FOR HIGH TRAFFIC COMMERCIAL APPLICATIONS

*The Schlage ALX Series is a grade 2 lock unlike any other. Designed to exceed expectations, it features a single, patent pending chassis design that supports most functions and all cylinder applications. As a modular lock, ALX Series enables in-field function set up or exchange and a field-selectable Vandlgard feature on all locking functions. Exceptional durability comes from a stainless steel latch bolt and deep-drawn spindles with 5 points of lever engagement and grade 1 compression springs that prevent droop and wobble. Perfectly suited to the ND grade 1 series, ALX also allows you to seamlessly suite between the two to gain grade 1 strength, security and functionality when and where you need it.*

SCHLAGE

### SCHLAGE ND SERIES

CONTINUOUS IMPROVEMENTS MAKES THE ND SERIES A SIMPLER, SMARTER, STRONGER LOCK

*The SCHLAGE ND Series is the toughest cylindrical lock we make. That means you get premium durability and performance in a lock that's also easy to service and maintain. And because we test our locks beyond the standards required by ANSI, you know that you're getting a product you can count on to withstand the use and abuse that come with heavy duty commercial applications.*

## CYLINDERS & HOUSINGS

BEST

### BEST 1E SERIES

#### FEATURES

#### 1E MORTISE CYLINDER

Standard mortise applications requires use of BEST's 1E series cylinder with standard 1E-C4 cam. BEST cylinders may be altered to function with other manufactures' locks by use of different cams and different cylinders rings. Special cylinder variations are available for most applications. BEST cylinders are machined from brass or bronze bar stock and are available in a variety of finishes. Additional security is provided by a set screw that mounts diagonally in the cylinder wall and when tightened, holds the cylinder securely in the housing. BEST mortise cylinders feature the BEST interchangeable core and may be master-keyed into any existing BEST system. Contact your local Stanley Security Solutions sales office for information on special cylinder applications not listed in this catalog.

FALCON

### FALCON

#### 1690 CONCEALED VERTICAL ROD TOUCHBAR DEVICE

*The design of the 1690 is ideal demanding, moderate-traffic applications. The vertical rods and latch mechanisms are concealed in the vertical door stile, ensuring trouble-free operation. Cast metal cover plates and end caps hold up to rigorous use. A quick, single-point dogging feature in the housing deactivate the device, permitting unrestricted traffic flow. The 1690 may also be used to retrofit a 1990 Series crossbar device.*

**\$334.75**

**1692NL - OP 36" - DC13**

**\$352.80**

#### 1790 RIM TOUCHBAR DEVICE

*The 1790 rim device is typically used in applications where maintenance is a concern because the rim device has fewer parts and pieces than current exit devices. The results is less maintenance and adjustment. The streamlined design has no openings for chains, reducing the risk for code infringements and offering increased building security by eliminating the possibility of tampering and forced entry through the use of coat hangers and other tools. The 1790 may also be used to retrofit a 2090 series crossbar device.*

#### HEAVY DUTY TOUCH BAR EXIT DEVICES

The perfectly simple, tougher than nails cost less than you think, fits anywhere exit device. Offices, banks, assisted living facilities, retail stores and other commercial buildings have constant traffic, so door hardware must be able to take continual use and abuse. The Falcon 24 & 25 Series exit devices fill the bill with some of the toughest, most reliable performance in the business. A host of features makes this a smart solution, like a choice of an A or B label fire rating, electrified and panic options, and a full complement of trims. Sleek, streamlined styling and a choice of wide (25 Series) and a narrow stile (24 Series) device applications means a smart solution for your building design, as well as its use. And since they're backed by one of the best names in the business, you can be sure you're getting the utmost value, reliability and durability.

## MULLIONS

### FALCON

#### REMOVABLE STEEL MULLIONS

F-4023 Shown

- The 2923, F4023, 4023, KRF-4023 and KR-4023 steel mullions are for use with the 25-R devices on double door openings.  
Advantage: Increased security and tighter closure. Minimizes door warpage and sag. Regulates the flow of in-and-out traffic
- Falcon removable mullions are easily removed and reinstalled for full width access
- Rim devices are used on both leaves, attaining a perfectly symmetrical opening
- The mullion assembly consists of a mullion, top and bottom mounting brackets and a screw pack
- The F4023 and KRF-4023 fire-rated mullions also include four stabilizer blocks as required for labeled installations
- Strikes are not furnished with the mullion. Please see page 15 for strike information
- Mullions may be cut on the job for doors under stock lengths
- KR Mullions require 1 1/4" mortise cylinder with standard A cam

#### Mullion features

- Mullion fittings - ductile iron
- F4023, 4023, KRF-4023 and KR-4023 - 2" x 3" x height
- 2923 mullion - 1 1/2" x 2 1/2" x height
- Prime coat only
- 7" or 8" door opening standard, other door opening as specified

#### Cylinders

- Cylinder supplied only when specified
- Cylinders keyed different

#### Sex bolts

- 325 (1/4"-20 thread)
- 425 (#10-24 thread)

#### Dummy touch bars

- Active and Inactive models only. Active model offered with RX or RX/KOR. Consult factory for details
- To order, specify 250DT X finish, or 250DT X finish X active touch bar

VON DUPRIN

## MULLIONS

### VON DUPRIN

#### REMOVABLE STEEL MULLIONS

Removable mullions

**Removable steel mullions** Mullions provide single door performance in double door openings with rim devices. Mullions are easily removed by loosening bottom set screw and removing top fitting cover. The top mullion fitting is attached to the frame and is concealed by the fitting cover.

Steel mullions are 2" (51mm) wide and 3" (76mm) deep, with a wall thickness of 1/8" (3mm).

Mullions are shipped with mounting screws and prepared for strikes. Strikes are not included except where indicated.

Steel mullions are available in SP28 and SP313 finishes. Consult factory for other powder coat finish options.

**KR – Keyed removable steel mullions** makes removal faster and easier by a single operation of the mortise cylinder. Once mullion is removed, large equipment or furniture can freely pass through the opening. The unit will self lock when re-installed, without use of the cylinder key. Uses a 1 1/2" mortise cylinder with a straight cam (Schlage cam reference B502-191). Cylinders are sold separately. Prefix mullion model with "KR".

**Removeable aluminum mullions** are 1 1/8" (27mm) wide on face closest to the door and 2 7/8" (60mm) at the widest point. The depth is 3 3/8" (79mm) with a wall thickness of 1/8" (3mm).

Aluminum mullions are available in US4, US10, US28, 313 and 315 finishes. Consult factory for other powder coat finish options.

Stock Hollow Metal Applications for devices mounted to cover ANSI 161 cutouts are higher than the standard mullion strike location. Consult the factory for special strike preparation or order a blank mullion. See below.

Blank Mullions are furnished without strike preparation. They are used to mount devices at a strike height different from the standard mullion preparation.

Keyed removable steel mullions

#### To order, specify:

1. For keyed Removable option on steel mullions, prefix model number with "KR"
2. Model number.
3. Height of opening
4. Finish
5. Handing if required.
6. Centerline deviation (refer to device template for standard centerline).
7. Strikes, when required, should be ordered with device.
8. For keyed Removable option on steel mullions, prefix model number with "KR"

### FALCON

### SC60A SERIES

FALCON

#### OVERVIEW

When you need a dependable closer for a light or medium-duty commercial application like a small boutique or office, the Falcon SC60A Series fits perfectly. Designed for interior use with aluminum storefronts and mix use complexes, the SC60A Series offers ANSI Grade 1 durability backed by a ten-year warranty. Since the SC60A has the most common hole pattern in the industry, it's a versatile and easy choice for retrofit. The SC60A is another great example of how Falcon provides a solid product at a solid price.

#### PRODUCT SPECIFICATIONS

- Single piece cast aluminum body
- Fully adjustable size 1-5
- Separate adjustable general speed, latch speed and backcheck
- Industry common hole pattern retrofittable to Norton 1600
- Non-handed for left-or-right-swing doors
- Heat treated pinion and steel piston
- Staked valves
- Universal screw pack, now including SRTs screws
- Meets ANSI A117.1
- Certified ANSI/BHMA A156.4, Grade1
- Cover is UL approved for use in fire rated assemblies
- UL listed and compliant to UL10C and UBC 7-2 (1997)
- 10-year warranty

## CLOSERS

### NORTON

#### 1600 SERIES

#### ALUMINUM STOREFRONT DOOR CLOSERS

##### REGULAR ARM

*This is the only pull-side application where a double lever arm is used. It is the most power-efficient application for a door closer. Sufficient frame, door and/or ceiling clearance must be considered. Since the arm assembly projects directly out from the frame, this application may present an aesthetics issues or be prone to vandalism.*

##### TOP JAMB

*For efficiency reasons this application provides the best alternative to the regular arm application. These must be sufficient frame face and/or ceiling clearance for this application. It requires a top rail on the door of just 2-1/8" (54 mm). This application provides the best door control for doors in exterior walls that swing out of a building. The entire closer and arm assembly project from the frame, similar to the regular arm application, where the matters of appearance and malicious abuse can be concern. Consideration must be given to depth of the frame reveal.*

##### PARALLEL ARM

*This application provides the most appealing design appearance for a surface-mounted door closer having a double lever arm. This may also be beneficial in vandalism-prone areas. It is on the push side of the door and the arm assembly extends almost parallel to the door. In the closed position, there is a very little or no hardware projecting beyond the frame face in most situations. Due to the geometry of the arm it is approximately 25% less power-efficient than a regular arm application. The entire closer and arm assembly are mounted below the frame stop, requiring a top rail clearance on the door of between 5-3/8" (137 mm), when using a low-profile arm (1680 series), to 6-3/8" (162 mm), when using the hold open arm.*

# ELECTRIFIED HARDWARE

## ADAMS RITE

### ELECTRIC STRIKES

#### 7100

ADAMS RITE

7100

#### Features

##### Case

1" x 3-3/8" x 1-5/8" deep  
[25.4 mm x 85.7 mm x 41.3 mm deep].

##### Strike Opening

5/8" x 1-7/16" x 1/2" deep  
[15.9 mm x 36.5 mm x 12.7 mm deep].  
Bolt retaining keeper is stainless steel.  
Strike accepts bolt of any Adams Rite  
4500, 4700 (discontinued), or 4900  
Deadlatch or cylindrical latches.

##### Strike Lip

Basic strike has lip of proper length for  
1-3/4" [44.5 mm] thick door that closes  
flush with jamb edge. Where door  
thickness or jamb shape differs from this  
standard relationship, lip extension kits are  
available, specified by last dash number.

- Lip extension kits not available  
on 7101 or 7131.

##### Latchbolt Projection

1/2" to 5/8" [12.7 mm to 15.9 mm]

##### Standard Package

Individually boxed with mounting screws,  
mounting clips, adhesive shims to  
accommodate jamb or stile extrusion thickness  
greater or less than nominal 1/8" [3.2 mm].

7140 Includes mounting clips and adhesive  
shims for use where welded tabs are omitted.

##### Shipping Weight

2 lbs [0.91 kg].

#### Electrical

##### Voltage

Available in 12, 16, or 24 Volt AC and  
DC. DC continuous units are silent, AC  
intermittent units "buzz" on operation.

##### Current Draw

0.33A at 12 VDC	1.42A at 12 VAC
0.22A at 16 VDC	0.63A at 16 VAC
0.17A at 24 VDC	0.74A at 24 VAC

##### Fail Safe | Fail Secure

Field selectable at time of installation.  
However, AC intermittent solenoid must  
not be used continuously in either.

#### Options

- Available with two Form "C" monitoring  
switches to indicate when the latchbolt  
is engaged in the strike and whether the  
strike jaw is blocked.  
Not available on 7130/7131, 7140.
- Lip extension kits for various  
dimensions of door centerline to  
jamb edge, for flat faceplates only.  
Not available on 7101 or 7131.
- **Modular Packaging**  
Match one strike body kit with one  
faceplate kit to make a complete electric  
strike. Faceplate kits contain all hardware  
to mount electric strike. Please contact  
factory or sales representative for details.

#### Faceplate

Available in a variety of architectural finishes.

7100	1-1/4" x 4-7/8" [31.8 mm x 123.8 mm]	Flat with radius corners
7101	1-1/4" x 4-7/8" [31.8 mm x 123.8 mm]	Radiused to match nose on inactive leaf in a pair of narrow stile doors.
7110	1-7/16" x 7-15/16" [36.5 mm x 201.6 mm]	Flat with radius corners
7111	1-7/16" x 10-1/4" [36.5 mm x 260.4 mm]	Flat with radius corners
7130	1-1/4" x 6-7/8" [31.8 mm x 174.6 mm]	Flat with radius corners
7131	1-1/4" x 6-7/8" [31.8 mm x 174.6 mm]	Radiused to match nose on inactive leaf in a pair of narrow stile doors
7140	1-1/4" x 4-7/8" [31.8 mm x 123.8 mm]	Flat with square corners

7130/7131: Large 6-7/8" faceplate is designed  
to cover strike opening when converting from  
an MS® pivoted-bolt deadlock to deadlatch.

## ELECTRIFIED HARDWARE

HES

**HES**

### ELECTRIC STRIKE

1006

**WORKS WITH ALL CYLINDRICAL & MORTISE LOCKSETS  
WITH OR WITHOUT A DEADBOLT**

**THE STRONGEST, MOST VERSATILE ELECTRIC STRIKE  
AVAILABLE.**

*The HES 1006 Series Electric Strike is the strongest and most versatile electric strike available. The dual interlocking plunger design and heavy duty stainless steel construction enables it to exceed every standard developed for electric strikes. With multiple faceplate options, the HES 1006 will fully accommodate every lock designed to work within an ANSI 4-7/8" strike plate. Tested to exceed 3,000 lbs of static strength, 350 ft-lbs of dynamic strength and factory tested to exceed 1 million cycles of operation, the HES 1006 is in a class of its own.*

#### FEATURES

- Stainless steel construction
- Tamper resistant
- Static strength 2,500 lbs
- Dynamic strength 350 ft-lbs (fail secure)
- Endurance 1 million cycles
- Fail secure (standard)
- Non-handed
- Accommodates up to 1" (25.4 mm) deadbolt
- Full keeper shim for horizontal adjustment
- Plug-in connector
- Trim enhancer
- Strike body depth 1-11/16" (43 mm)
- SecuriCare five-year, no fault, no questions asked warranty (Addition of HES SMART Pac® III extends the warranty to 10 years)

#### OPTIONAL FEATURES

- LBM Latchbolt monitor
- LBSM Latchbolt strike monitor
- Fail safe
- Interchangeable faceplates
- Monitor switches may not work with all faceplate options

#### ACCESSORIES

- HES-CUT-MTK Metal template kit
- 2005M3 SMART Pac® III
- 1000-102 Rain guard
- 1006-103 Full keeper shims
- 1000-104 Lip extension trim adapter
- 1006-105 Trim enhancer BLK (goof plate)

## ELECTRIFIED HARDWARE

**HES**

### ELECTRIC STRIKES

**5000**

**WORKS WITH ALL CYLINDRICAL LOCKSETS UP TO A 5/8" THROW LATCHBOLT**

**THE GRADE 1, LOW-PROFILE SOLUTION FOR CYLINDRICAL LOCKSETS.**

*The HES 1006 Series Electric Strike is a compact, high performance electric strike designed for low profile openings where there is limited space behind the jamb. Its strength is derived from a unique keeper pin locking design, enabling the HES 5000 to exceed the rating of the frame, door and locking hardware. The field selectable fail safe/fail secure unit is easy to install and accommodates latchbolts up to 5/8" throw.*

#### FEATURES

- Tamper resistant
- Static strength 1,500 lbs
- Dynamic strength 70 ft-lbs (fail secure)
- Endurance 1 million cycles
- Field selectable fail safe/fail secure
- Non-handed
- Internally mounted solenoid
- Accommodates 1/2" - 5/8" (12.7 mm - 15.9 mm) latchbolt (5/8" {15.9 mm} with 1/8" {3.2 mm} door gap)
- Strike body depth 1-1/16" (27.3 mm)
- Plug-in connector
- Trim enhancer included
- SecuriCare five-year, no fault, no questions asked warranty (Addition of HES SMART Pac® III extends the warranty to 10 years)

#### OPTIONAL FEATURES

- LBM Latchbolt monitor

#### ACCESSORIES

- 150 Strike latch guard
- HES-CUT-MTK Metal template kit
- 2001M Plug-in bridge rectifier
- 2004M ElectroLyn® adapter
- 2005M3 SMART Pac® III
- 2006M Plug-in buzzer
- 5104-1/2 1/2" (12.7 mm) stackable lip extension
- 5104-1 1" (25.4 mm) stackable lip extension
- 5104-1-1/4" 1-1/4" (32 mm) stackable lip extension

### ELECTRIC STRIKE

**8000**

**WORKS WITH CYLINDRICAL LOCKSETS AND ACCOMMODATES LATCHBOLTS UP TO 5/8" THROW**

**THE CONCEALED ELECTRIC STRIKE SOLUTION FOR CYLINDRICAL LOCKSETS.**

*The HES 8000 Series Electric Strike is a compact, high performance electric strike featuring a unique concealed design for use with cylindrical locksets. No cutting in the frame is required. Simply remove the existing strike plate, adjust the vertical alignment feature to the latchbolt centerline and install. Its strength is derived from a unique keeper pin locking design, enabling the HES 8000 to exceed the ratings of the frame, door and locking hardware. This field selectable fail safe/fail secure unit is easy to*

*install and accommodates latchbolts up to 5/8" throw.*

#### FEATURES

- No cutting on frame required
- Vertical adjustability to accommodate door sag and misalignment
- Tamper resistant
- Static strength 1,500 lbs
- Dynamic strength 70 ft-lbs
- Endurance 1 million cycles
- Field selectable fail/fail secure
- Non-handed
- Internally mounted solenoid
- Accommodates 1/2" - 5/8" (12.7 mm - 15.9 mm) cylindrical latchbolt (5/8" [15.9 mm] with 1/8" [3.175 mm] door gap)
- Strike body depth 1-1/16" (27.3 mm)
- Strike body width 1-7/16" (36.5 mm)
- Plug-in connector

#### FEATURES

- SecuriCare five-year, no fault, no questions asked warranty (Addition of HES SMART Pac® III extends the warranty to 10 years)

#### OPTIONAL FEATURES

- LBM Latchbolt monitor

#### ACCESSORIES

- 2001M Plug-in bridge rectifies
- 2004M ElectroLynx® adapter
- 2005M3 SMART Pac® III
- 2006M Plug-in buzzer

### **SURFACE MOUNTED ELECTRIC STRIKES**

**9400**

**WORKS WITH RIM EXIT DEVICES UP TO 1/2" THROW LATCHBOLT**

**THE SLIM-LINE, SURFACE MOUNTED SOLUTION.**

*The HES 9400 Series Electric Strike is a slim-line, surface mounted electric strike designed to accommodate rim exit devices with a 1/2" throw Pullman latchbolt. All components are completely encased within its 1/2" thick stainless steel housing, so no cutting on the frame is required for installation. Simply place the electric strike on the surface of the frame, align it with the exit latchbolt, and install.*

#### **FEATURES**

- Installs in metal and wood frames
- Wood screws not provided
- One 1/8" (3.2 mm) spacer plate included
- Decorative cover for sleek look
- Stainless steel construction
- Tamper resistant
- Static strength 1,500 lbs
- Dynamic strength 70 ft-lbs
- Endurance 1 million cycles
- Field selectable fail safe/fail secure
- Horizontal adjustability
- Non-handed
- Internally mounted solenoid
- Accommodates up to 1/2" (12.7 mm) Pullman latch
- SecuriCare five-year, no fault, no questions asked warranty (addition of HES SMART Pac® III extends the warranty to 10 years)

#### **OPTIONAL FEATURES**

- LBM Latchbolt monitor
- LBSM Latchbolt strike monitor

#### **ACCESSORIES**

- 9000-116-xxx 1/16" Spacer plate (Available in 613E, 628E, 630 & BSP finishes)
- 9000-108-xxx 1/8" Spacer plate (Available in 613E, 628E, 630 & BSP finishes)
- 9000-MTX Metal template kit
- SMB Surface mounting box
- 2001M Plug-in bridge rectifier
- 2004M ElectroLynx® adapter
- 2005M3 SMART Pac® III
- 2006M Plug-in buzzer
- 9000-ASB-XXX Aluminum spacer bracket (Available in 613E, 628E, 630 & BSP finishes)

### **SURFACE MOUNTED ELECTRIC STRIKE**

**9500**

**WORKS WITH RIM EXIT DEVICES UP TO 3/4" THROW  
PULLMAN LATCHBOLT**

**THE DURABLE FIRE RATED SURFACE MOUNTED  
SOLUTION.**

*The HES 9500 Series Electric Strike is a three hour fire rated, surface mounted electric strike designed to accommodate rim exit devices with a 3/4" throw Pullman latchbolt. All components are completely encased within its 3/4" thick stainless steel housing, so no cutting on the frame is required for installation. Simply place the electric strike on the surface of the frame, align it with the exit latchbolt and install. Adjustments have never been easier as the base is now separate from the cover. The HES 9500*

*exceeds Grade 1 standards for strength and performance. It is field selectable for fail safe/fail secure operation, and for 12 or 24 VDC. This unique electric strike complies with NFPA 80-07 guidelines for retrofit into fire rated frame.*

#### **FEATURES**

- Installs in metal or wood frames (wood screws not included)
- Separate base and decorative cover for easy adjustments
- Stainless steel construction
- Tamper resistant
- Static strength 1,500 lbs
- Dynamic strength 70 ft-lbs
- Endurance 1 million cycles
- Field selectable fail safe/fail secure
- Horizontal adjustability
- Non-handed
- Internally mounted solenoid
- Accommodates up to 3/4" (19 mm) Pullman latch

#### **FEATURES**

- SecuriCare five-year, no fault, no questions asked warranty (Addition of HES SMART Pac® III extends the warranty to 10 years)

#### **OPTIONAL FEATURES**

- LBM Latchbolt monitor
- LBSM Latchbolt strike monitor

#### **ACCESSORIES**

- 9000-116-XXX 1/16" Spacer (Available in 613E, 628E, 630 & BSP finishes)
- 9000-108-XXX 1/8" Spacer plate (Available in 613E, 628E, 630 & BSP finish)

### STEELCRAFT F SERIES

STEELCRAFT

#### About the product

F Series 3-sided flush frames are designed to meet requirements for light to maximum duty applications in both commercial and institutional buildings. They are installed in both interior and exterior locations, and in virtually all types of buildings and wall constructions. These frames are to be installed as part of the wall framing sequence. They can be specified and supplied as KD (knock-down) for field assembly prior to installation or welded for installation as a complete unit.

#### Installation

1. Installation shall conform to the published Steelcraft installation instructions, ANSI A250.11-2001 (formerly SDI 105) *Recommended Erection Instructions for Steel Frames and HMM 840*.
2. Fire Rated Assemblies must be in accordance with NFPA Pamphlet 80. The *Authority Having Jurisdiction* is the final authority in issues related to the installation and use of installed Fire Rated Doors.

#### Features and benefits

Steelcraft F Series flush frames offer the following unique features, which enhance long term functionality and durability:

1. **Die-mitered corner connections:** Die-mitered corner connection at the head and jamb insure an attractive, tight and closed mitered connection. The miter includes 4 corner tabs designed with concealed connection eliminating the need for continuous profile welding.
2. **Patented universal hinge preparations** allow for easy field conversion from standard weight .134" (3.3mm) thick hinges to heavy weight .180" (4.7mm) hinges.
3. **Adjustable base anchors** allow for installation adjustment when the floor is not level.
4. **Factory prepared** for field installed silencers.
5. **Factory applied baked on rust inhibiting primer** in accordance with ANSI A250.10-1998 (R2004).

#### Specification compliance

1. Overall frame construction for the Steelcraft F Series flush frames meets the requirements of ANSI A250.8-2003 (commonly referred to as SDI-100).
2. Hardware preparations and reinforcements are in accordance with ANSI A250.6-2003. Locations are in accordance with ANSI/DHI A115.

#### Fire ratings

The F Series flush frames meet the broadest fire rating requirements. They are listed for installations requiring compliance to both neutral pressure testing (ASTM E152 and UL 10B) and positive pressure standards (UL 10C). Refer to the **Fire Rated Section** of this manual for particular listings.

#### Applications

F Series frames are typically installed in wall construction types as defined in the chart below:

#### Frame applications

Profile	Steel thickness	Wall construction	Typical wall anchors
F16	16 Gauge [0.053" (1.3mm)]	Wood or steel stud	Lock-in stud anchor
F16	16 Gauge [0.053" (1.3mm)]	Masonry	Wire masonry
F16	16 Gauge [0.053" (1.3mm)]	Existing masonry	Bolted through soffit
F14	14 Gauge [0.067" (1.7mm)]	Wood or steel stud	Lock-in stud anchor
F14	14 Gauge [0.067" (1.7mm)]	Masonry	Wire masonry
F14	14 Gauge [0.067" (1.7mm)]	Existing masonry	Bolted through soffit
F12	12 Gauge [0.093" (2.3mm)]	Wood or steel stud	Lock-in stud anchor
F12	12 Gauge [0.093" (2.3mm)]	Masonry	Wire masonry
F12	12 Gauge [0.093" (2.3mm)]	Existing masonry	Bolted through soffit

## HOLLOW METAL

### DOORS AND FRAMES

STEELCRAFT

#### Profile terminology

The frame profile has specific terminology related to each surface. Their jamb depth describes the frame size required.

It is critical that the throat opening of the frame be compatible with the wall to which it will be attached.

#### Double rabbet: standard profile

#### Profile variations

Steel frames are supplied standard as double rabbet. To accommodate various application needs, the frame profile (in any frame series) can change. Some of the typical variations are as follows:

**Single rabbet:** Jamb depths below 4-1/2" (114mm) are single rabbet due to the dimensional limitations of the profile. Some specifications will require single rabbet profiles on frames over 4-1/2" (114mm) in jamb depth.

Profile as shown will vary on MU, DW, and K Series frames, refer to the appropriate data sheets.

**Cased open:** Used for double acting doors (swinging in both directions), sliding doors, bi-fold doors or frames used to close-off an opening in a wall when a door is not required.

**Double egress:** This is a frame specifically designed for cross corridor applications where traffic control is required. **This frame is not available in the Drywall Series (DW and T) or Multi-Use Series (MU).**

#### Anchors

Frames must be anchored to the applicable wall construction. Wall construction at door openings must be of sufficient construction to support commercial or institutional grade steel doors and frames. Refer to the appropriate frame data sheets since anchor types will vary with frame constructions and noted in this manual. Basic guidelines is as follows:

##### Flush frames:

- **Base anchors:** one located at the bottom of each jamb
- **Jamb anchors:** Locate anchors near each hinge location in both hinge and strike jambs. Transom frames require additional anchors above the top hinge.
- **Head anchors:** For wide frame openings usually over 60" in width, an anchor located in the center of the frame head is recommended

##### Drywall frames:

- **Base anchors:** two (2) located at the bottom of each jamb
- **Jamb anchors:** Drywall frame includes an adjustable compression anchor near the top of each jamb

## HOLLOW METAL

### STEELCRAFT L SERIES

STEELCRAFT

#### About the product

The L20, L18, and L16 Series flush doors are designed to meet the architectural requirements for full flush doors. The L14 Series flush doors are designed to meet the architectural requirements for maximum duty full flush doors. Refer to the Architectural section for specifications and the selection and usage guide of the appropriate door constructions.

This premium door construction combines the strength and dimensional stability of steel with the structural integrity of the laminate core. The continuous bonding of core to steel face sheets provides an attractive, flat door, free of face welding marks. Tests have proven that the L Series door has high resistance to impact damage, low thermal conductivity and high STC ratings.

To meet application, specification and performance requirements, the L Series door offers a wide range of specifiable options including sizes, glass light designs and hardware (mechanical, pneumatic, electrical) preparations.

L Series doors are 1 3/4" (45 mm) thick.

#### Installation

1. Installation shall conform to the published Steelcraft Installation instructions, ANSI A250.11-2012 (formerly SDI 105) Recommended Erection Instructions for Steel Frames and HMMA 840s.
2. Fire Rated Assemblies must be in accordance with NFPA Pamphlet 80. The Authority Having Jurisdiction is the final authority on issues related to the installation and use of installed Fire Rated Doors.

#### Features and benefits

Steelcraft's L Series doors offer the following standard unique features, which enhance long term performance and durability:

1. **Core Systems** that enhance the structural integrity of the door:
  - **Honeycomb (standard):** 1" (25 mm) cell kraft honeycomb configuration that increases structural integrity while reducing overall weight
  - **Polystyrene (optional):** enhanced thermal performance
  - **Polyurethane (optional):** extreme thermal performance
2. **Full Height, Epoxy Filled Mechanical Interlock Edges** provide structural support and stability the full height of the door edges. Available edge options:
  - **Visible Edge Seam (standard):** full height, epoxy filled mechanical interlocked edges
  - **Filled Edge Seam (optional add to standard):** seam filled with structural adhesive and dressed smooth. Includes tack welds above and below edge cutouts for hinges, locks, etc.
  - **Welded Edge Seam (optional add to standard):** intermittently welded using 1" long welds, then seam filled with structural adhesive and dressed smooth. Option available on L18, L16 and L14 doors.
3. **Universal Hinge Preparations** (patented) allow for easy field conversion from standard weight .134" (3.3 mm) hinges to heavy weight .180" (4.7 mm) hinges.
4. **14 Gauge [0.067" (1.7 mm)] Inverted Top and Bottom Channels** provide stability and protection for the top and bottom edges from abuse.
5. **Beveled Hinge and Lock Edges** allow for tighter installation tolerances, ensure easier operation and eliminate binding and sticking.
6. **Recessed Designer™ Glass Trim** provides a clean, neat and flush finish with the door surface.
7. **Factory Applied Baked-On Rust Inhibiting Primer** paint in accordance with ANSI A250.10-2011.

#### Specification compliance

1. Door construction for Steelcraft L Series full flush doors meets the requirements of ANSI A250.8-2017 (SDI 100).
2. Hardware preparations and reinforcements are in accordance with ANSI A250.6-2003 (R2009). Locations are in accordance with ANSI/DHI A115 unless otherwise stated.

#### Fire ratings

L Series doors meet the broadest fire rating requirements. They are listed for installations requiring compliance to both neutral pressure testing (ASTM E152 and UL-10B) and positive pressure standards (UL-10C).

## HANDING CHART

HANDING

### HANDING

#### Handing procedures diagrams

To determine the hand of a door, view the door from the outside (the side that hinges are on is the hand of the door).

- If the door swings away from the viewer, the hand is regular hand, i.e., right or left hand.
- If the door swings to the viewer, the door is reverse swing, i.e., right hand reverse swing or left hand reverse swing.

All Steelcraft Doors and Frames are handed according to the following chart::

<p><b>Right Hand Door (swing in) Right Hand Frame</b></p>	<p><b>Left Hand Door (swing in) Left Hand Frame</b></p>
<p><b>Right Hand Reverse Bevel Door (swing out) Left Hand Frame</b></p>	<p><b>Left Hand Reverse Bevel Door (swing out) Right Hand Frame</b></p>
<p><b>Pair of Doors – LH Active (swing in) Double Door Frame – LH Active</b></p>	<p><b>Pair of Doors – RH Active (swing in) Double Door Frame – RH Active</b></p>
<p><b>Pair of Doors – LHRB Active (swing out) Double Door Frame – RH Active</b></p>	<p><b>Pair of Doors – RHRB Active (swing out) Double Door Frame – LH Active</b></p>

K - indicates Key side of the active door
